Environmental Policy

Revision update	Approved by
02 November 2026	

Purpose and commitment

Prime plc is committed to protecting the environment and preventing pollution whilst continually improving both environmental performance and the effectiveness of our Environmental Management System (EMS). This policy provides the framework for setting and reviewing environmental objectives.

We will identify and address environmental risks and opportunities associated with our activities, products and services, including climate change adaptation, biodiversity, ecosystem health and the life cycle impacts of our activities, products and services.

Our approach

We will involve our people, designers, advisers, suppliers, customers and delivery partners to improve environmental performance and influence positive outcomes across the value chain.

This policy will be communicated within Prime, made available to relevant external parties, and reviewed at least annually and when significant organisational, operational, or legislative changes occurs.

Leighton Chumbley
Chief Executive

Prime will

- Fulfil applicable legal requirements and other compliance obligations relating to our environmental aspects;
- Prevent pollution, use natural resources responsibly, minimise waste, and apply circular economy principles by prioritising reduction, reuse, and responsible recycling;
- Integrate environmental considerations into investment, design, procurement, construction and operational activities, applying life cycle thinking and managing environmental impacts arising from change;
- Protect and where practicable, enhance biodiversity and ecosystems whilst improving resilience to climate-related risks;
- Establish measurable environmental objectives and targets, monitor performance and maintain appropriate evidence to demonstrate achievement of commitments;
- Promote environmental awareness and responsibility amongst our people and relevant stakeholders; and
- Continually improve our Environmental Management System and environmental performance to enhance environmental outcomes.

Carbon and greenhouse gas commitments are set out in our Carbon Reduction Policy.
